

CoolTherm™ Military

Professional Emergency Dressing for Burns

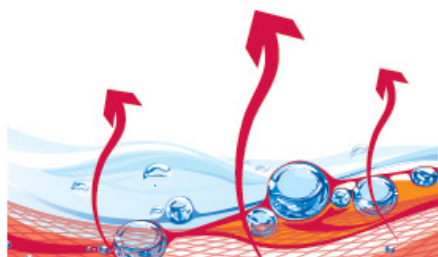

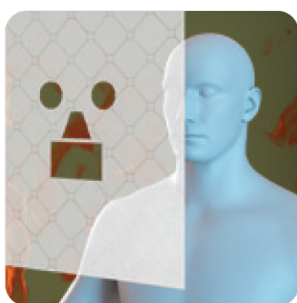

CoolTherm™
cools the heat - eases the pain
Professional Emergency Dressing for Burns

Unique dual purpose design -

use as a face mask or large 30cmx40cm burn dressing

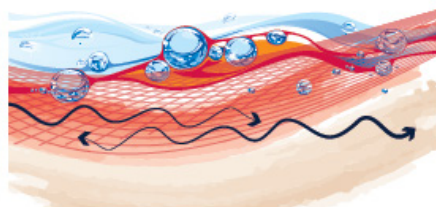

The eye, nose, and mouth apertures are perforated and can be removed with ease. This allows quick preparation of the dressing for use on a face. Alternatively, leaving the perforated areas in place renders the dressing suitable for covering larger body areas such as a limb or the torso.

This dual-purpose design offers additional flexibility, particularly valuable in the space limited environment of an emergency ambulance.

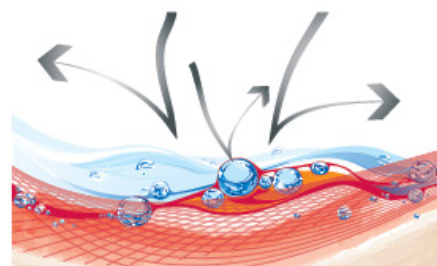

HEAT EXCHANGE

CoolTherm™ absorbs the thermal energy from the burn, dissipating the heat, and cooling the skin

PAIN RELIEF

CoolTherm™ relieves the pain by isolating damaged nerve endings from the air

BARRIER TO CONTAMINANTS

CoolTherm™ protects against contamination by providing a sterile physical barrier

SIZE: 20cm X 20cm

The Rule of 9's

The CoolTherm™ packaging includes an image of the 'Rule of 9's', helping assess the burn area. Additionally, CoolTherm™ packaging is marked with the adult and child body area percentages that the dressing will cover. Total body surface area (TBSA) is an assessment measure for burns of the skin.
