

FRSA FIRE DEPOT

Ready to Deploy | Customisable

Product Overview

FRSA's fire depots allow sites to be ready for rapid deployment of all firefighting needs. Whether the depot is for a surface fire or underground coal fire fighting, our Fire Depots are equipped and ready to use.

These fire depots are fully built at FRSA for the site to QA before going underground or on surface immediately. At FRSA, we have stock holdings of 20 fire depots held at all times to ensure minimum wait times.
