

Holmatro Chocks & Blocks Set A

Stabilisation Assist Tools

Product Overview

Holmatro chocks, blocks, and wedges are ecologically sound because they are made of recycled polyethylene which is 100% re-usable and has a longer life span in comparison to wood. Polyethylene also can't splinter and has a lower weight that floats on water.

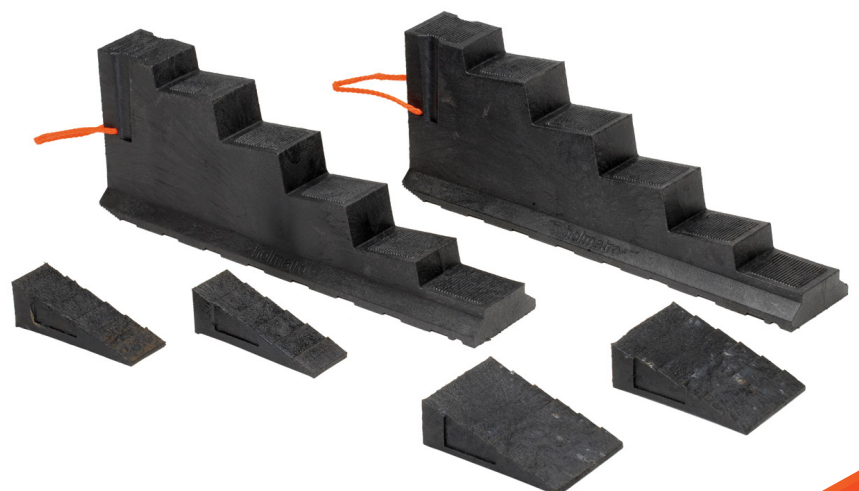

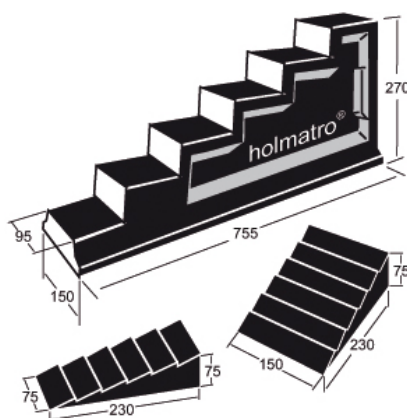

Key Features

- **Environment-friendly:** Made of recycled polyethylene, 100% reusable
- **Longer life span than wood:** Virtually indestructible through one piece moulding
- **Non-absorbent material:** Total resistance to water and oil
- **Stackable:** Nonslip with unique surface profile design
- **Extra grip due to elasticity of material under load**
- **Higher surface pressure allowed:** Supports 100 kg/cm² in all directions
- **Lightweight:** Floats on water
- **No splintering:** Safe

Specifications	
Article number	150.562.010
