

SKYLOTEC

CONREST PRO+ Leg Support

Extension for CONREST PRO+

Product Overview

The practical plug-in connection makes it easy to attach and remove the leg support extension. It transforms a half stretcher into a full stretcher and provides additional stability during transportation when more space is available. The integrated suspension improves stabilisation in a horizontal position, while two handles enable optimum handling. The extension can also be purchased if required.

Key Features

- Easy handling: Practical plug-in connection enables effortless assembly and disassembly of the leg support
- Additional stability: Converts a half stretcher into a full stretcher for safe transportation when more space is available
- Improved stabilization: Integrated suspension and two handles ensure optimal handling and stability in a horizontal position

Applications

- Working in confined spaces
- Off Shore Industry
- Rescue
- Emergency
- Shaft
- Working on masts and towers
- Wind energy
