

SKYLOTEC ULTRAFLEX PRO

Transport Suspension

Product Overview

The UltraFLEX PRO transport suspension enables an easy change from horizontal to vertical patient orientation under load. The continuously adjustable inclination angles of the individual straps make flexible adjustment and setting during the rescue procedure under load as easy as possible. The right and left axes can also be adjusted under load. The entire length of the system can be shortened, allowing it to be used where space and height are limited. A pulley block is included in the delivery, which can be used optionally.

Key Features

- Maximum flexibility through various setting options
- System length can be shortened
- Includes optional pulley system

Applications

- Tactical approach
- Rescue

Specifications	
Article number	SAN-0097-P
GTIN	4251824307417
E-class number	34-45-03-90
Customs tariff number	73129000
Net weight	2.50 kg
Gross Weight	2.80 kg
Colour	Various
Maximum lifetime	10 years
Minimum temperature	-35 °C
Maximum temperature	45 °C
Material	Polyamide, Polyester, Various, Aluminium, Stainless Steel
