## 4BELL SILVER+

Lightweight Stair Chair

### Product Overview

4BELL SILVER+ is a stair chair designed to transfer or evacuate patients with mobility limitations from multi-storey buildings. The chair is FDA compliant and built in accordance to the specifications set by EN 1865-1.

If the stair chair is installed on the 4Bell Max+ bracket, it will comply with 10G crash test according EN 1789 standard.

The frame of the chair is made in aluminum for increased resistance. Its total weight is 9,4 kg (20.7 lb).

### Key Features

- **Frame in aluminum** makes the chair lightweight and resistant at the same time
- **Two telescopic handles at the front and two foldable ones behind the backrest** help lifting and transport operations
- **Rear wheels' locking mechanism** makes sure the chair does not slide on a flat surface
- **Semirigid seat and soft backrest** are built to increase patient comfort
- **Foldable footrest** increases patient stability
- **Easy to clean PVC seat and backrest** are resistant to chemicals
- **Pivoting front wheels** makes the chair more maneuverable.
