

Spencer Blue Splints Kit

Rigid Splint Set With Flexible Internal Structure

Product Overview

Blue Splints Kit is a must-have immobilization set designed to help rescue workers to effectively stabilise suspected fractures of limbs on patients, reducing pain and risks of additional damage during pre hospital transport operations.

Key Features

- Blue Splints Kit comes with 5 highly-resistant rigid splints and a carry bag
- Self-adherent straps ensure a safe and fast immobilisation of the limbs
- An additional orange strap identifies the attach area of each splint, making the strapping process faster
- Very easy to wash and resistant to bacteria contamination
- The structure and design of blue splints allow paramedics to provide emergency infusion.

Applications

- EMS
- Rescue

Materials

- Neoprene, Al, Nylon
