

45kg Gas Cylinder

The Gasworks' 45kg Gas Cylinder Live Fire Training Device is designed to simulate a real-life emergency scenario, producing intense flames and authentic heat.

Trainees can experience realistic fire scenarios with remote start and stop controls. Quick-connect fittings enable rapid setup, allowing training within minutes.

All Gasworks' Live Fire Training Devices are built to withstand repeated use, ensuring cost-effective training.

Intense Flames & Real Heat

Our realistic training device produces intense flames and is built for maximum training realism.

Operate with Ease

Easily start and stop simulations from the control panel. Quick-connect fittings allow you to train within minutes.

Cost Effective

Built tough, our devices are engineered to stand up to years of simulated live fire training.
