LENS MARKING

- †P. Platinum is a permanent coating on both sides of the lens giving them a high resistance to scratching (1.4 cd / m²), to the most aggressive chemicals and delays the onset of fogging as per the testing requirements of EN166.
- I. The letter 'I' signifies 'Medium Impact' approval.
- O. The letter 'O' marking signifies that the product has been approved for the use both outdoors and indoors and the terminology used by Australian standards is 'outdoor un-tinted'. This marking appears on all clear, amber and contrast lenses
- C. The letter 'C' signifies that the product has been tested and approved for use against splashes and is appropriate for chemical handling.
- D. The letter 'D' signifies appropriate for protection against dust.
- G. The letter 'G' signifies that the product has been approved for use against gas and fine dust particles.

OCULAR LENS CATEGORY:

- O. Range of luminous transmittance 80-100% (Clear).
- 1. Range of luminous transmittance 43-88% (CSP).

TECHNOLOGIES

CSP

This innovative coating is an effective solution for all activities that alternate exposure to bright light and low light, while also being suitable for extreme hot and cold temperature environments. CSP is also combined with the exclusive PLATINUM® coating that effectively combats fogging.

PLATINUM

The new exclusive scratch and fog resistant PLATINUM® coating guarantees even more safety, reliability and comfort. Washable (water and soap), this permanent coating applied on both sides of the lens makes it highly scratch resistant and effectively delays the appearance of fogging.
