

TRAUMAFIX™

PROFESSIONAL

EMERGENCY LIFESAVING EQUIPMENT

Pelvic Splint

Lightweight,
Versatile Support
for Pelvic Injury
Management

The **TraumaFix™** Pelvic Splint offers a practical solution for emergency treatment of suspected pelvic fractures. Lightweight and durable, the splint is ideal for use in emergency, pre-hospital settings. Designed for ease of application, the splint can be fitted and adjusted by a single responder, helping to stabilise the pelvis quickly and effectively.

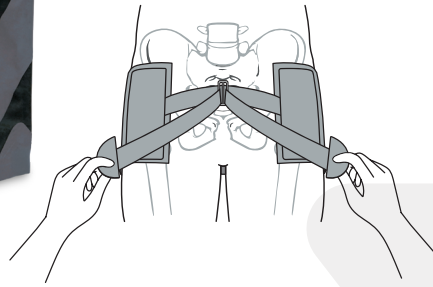

TRAUMAFIX™ Pelvic Splint

PROFESSIONAL

This single-use device features a universal fit suitable for a broad patient range - from paediatric to bariatric use. The splint can be cut to adjust size. The strong but soft neoprene material reduces friction and the potential for pressure-related skin injuries.

Compact and easy to store, the TraumaFix Pelvic Splint is an essential component for trauma care in the field.

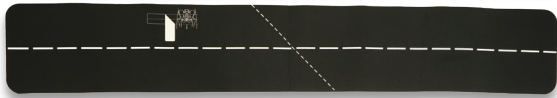

Key Benefits of the TraumaFix Pelvic Splint:

- Effective Stabilisation:**
 Applies compression to help immobilise the pelvis when a fracture is suspected.
- Ultra-Light and Portable:**
 The TraumaFix Pelvic Splint is easy to carry and pack with other emergency equipment.
- One Size, Multiple Applications:**
 Adaptable for all body types, and can be trimmed for better fit and access.
- Efficient to Use:**
 Designed for quick and easy one-person application - for emergency situations where every second counts.
- Skin-Friendly Design:**
 Stitch-free interior reduces the risk of pressure ulcers and tissue damage.
- Medical Access Ready:**
 Can be modified to allow access to vital body areas for emergency medical procedures.
