

PRODUCT DATA SHEET

PAX RESCUE-BOA

DESCRIPTION

The PAX Rescue-BOA makes it easy to evacuate patients from vehicles. It is based on the content of the PHTLS courses.

FEATURES

- Product conforms with the applicable EU regulations
- Product is a medical device and compliant with EU Regulation 2017/745 - MDR

YOUR THIRD HELPER

The PAX Rescue-BOA is a valuable aid for quick evacuation from vehicles. The two of you can rescue the patient professionally and quickly. PAX have developed it according to the contents of the PHTL courses. A detailed instruction manual is included.

ANTIBACTERIAL COVER ON THE OUTSIDE, WARMING BLANKET ON THE INSIDE

The PAX boa consists of three parts: the antibacterial cover, a strap with hand loops and a rolled-up fleece blanket as a filling. If necessary, you can remove the cover and use the filling as a warming blanket for your patient. Each of the three parts can be ordered as a replacement.

SNAKE FROM THE BAG

PAX delivers the Rescue-BOA in a handy carrying bag with details such as a double-barrelled zip and a business card pocket.
